As a current bachelor's degree candidate in Computer Science, I bring a robust foundation in core principles, encompassing object-oriented design, algorithm development, and data structures. My proficiency extends to programming and markup languages, with intermediate expertise in C++, Python, CSS, JavaScript, and SQL.

My academic pursuits align seamlessly with the innovative and dynamic landscape of the growing tech sector. I am committed to delivering high-quality software solutions within an agile framework, integrating industry best practices and demonstrating adaptability to evolving circumstances.

Driven by a passion for leveraging my skills to catalyse substantial advancements in the tech industry, I offer a distinctive blend of practical experience, academic excellence, and a forward-looking mindset. My goal is to contribute meaningfully to the ever-expanding realm of technology by embracing challenges and embracing continuous improvement.
